

**The Look of Wood.
The Strength of Steel.**

Introducing our SW SERIES...simulated wood grain steel doors

Metropolitan is introducing a new line of decorative simulated wood grain steel doors offering a powerful blend of aesthetics with performance. The warmth of wood fused with the strength of steel, built with the highest quality materials and workmanship.

From embossed 18 or 20 gauge doors with one, two, or six panel design, and honeycomb, polystyrene, or polyurethane cores, to flush doors in 12, 14, 16, 18, or 20 gauge, and honeycomb, polystyrene, polyurethane or mineral cores, as well as steel stiffened doors with fiberglass, or rockwool cores...there's a MDI® product for every design and application.

ADVANTAGES OF STEEL DOORS OVER WOOD DOORS:

- Available with a fire protection rating of up to 3 hours
- Steel doors will not swell, rot, or warp
- Highly resistant to UV Rays, corrosion, termites, and insects
- Steel doors are more durable for high-use applications
- Can be used for interior and exterior applications
- Can easily be specified for use with commercial hardware

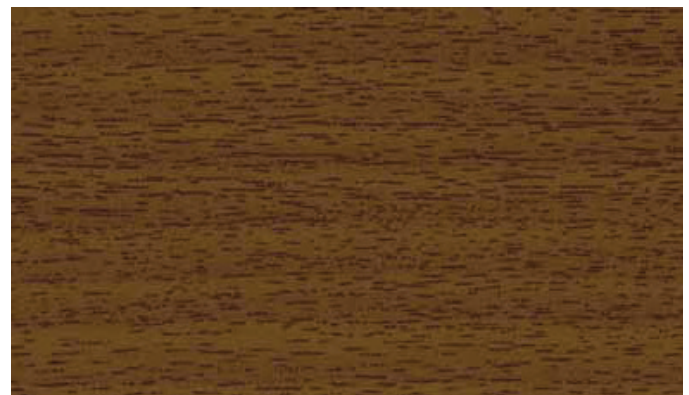

Select from a Wide Variety of Prefinished Wood Grain Effects

✓ Finishes with check mark are in stock. Contact office to inquire about minimum order quantity on all other finishes.

Powder Coating

In addition to decorative finishing, we also offer an unlimited choice of powder coating options. Our procedures comply with the very strict standards of AAMA (American Architectural Manufacturers Association) certifications and our innovative, material-specific pre-treatment process is one of the most environmentally friendly systems available today.

Powder coating is the electrostatic application of organic powders. This method of painting allows for a more consistent and durable finish. Our unrivaled dedication to quality control is what allows us to guarantee a product that meets among the highest architectural standards in the construction industry.

Some restrictions do apply.
